Don't leave Flagstaff without enough good drinking water to last 280 miles to TS 14 in Cortez, CO.

Dangerous traffic likely as you leave Flagstaff. High desert scenery: vegetation diminishes as the road descends and the brown, yellow, red, white, and gray colors of the cliffs dominate the views. Many elk warning signs early in this section. At about mile 42 the race enters the jurisdiction of the Navajo Nation and local clocks shift from Mountain Standard to Mountain Daylight Time. We will be the guests of various tribes almost all the way to TS 16, Pagosa Springs, Colorado. Be respectful of their culture.

Rolling ranch lands of eastern Colorado gradually yield to unexpectedly flat farm land. The one huinderd feet of climbing registered over the 70 miles of this section makes this the flattest section of the race but then there's that Kansas wind which can be friend or devil. The road narrows in Missouri. Follow US 54 E for this entire section. After entering Missouri 50 to 100 ft rollers start and grow throughout the section, but stay in the elevation range of 700 to 1000 ft.

Once past Nevada you'll know you're not in Kansas anymore! The route will stop seeming to be one dimensional, straight ahead and flat forever, but will begin to wander in all three. If you recall Colorado drivers in the mountains, here the scale is less grand but curves more abrupt, climbs and descents short but steeper, and traffic may seem a lot faster in these closer quarters often with little opportunity to get out of the way. From here to Time Station 35 the local folks seem determined to get where they're going without delay. Don't allow your racer to impede other traffic. Not only is it dangerous but it's also against RAAM rules. Look out for yourself and your racer's safety as if someone's life hangs in the balance.

The terrain moderates for the rest of Ohio but once into West Virginia past Parkersburg some of the most difficult climbing in RAAM begins. The altitude doesn't approach that of the Rocky Rocky Mountains but the climbs are relentless. There is more elevation gained in this section than any other time station segment anywhere east of Flagstaff but the most difficult measured in feet of climbing per mile ridden is still ahead between Cumberland and Hancock in Maryland.
